PROJECT TITLE

SATELLITE INSTALLATION AT NEW YUNDUM HOSPITAL MATERNITY WARD

INTRODUCTION

The Gambian Geneva Association is a community-based organization established to unite Gambians living in Geneva and to promote national identity. Beyond cultural activities, the Association actively engages in philanthropic projects that support social welfare and development initiatives in The Gambia.

One such initiative was recently undertaken at the New Yundum Hospital maternity ward, following the donation of a television set by Mr. Abubacarr Ceesay, a member of the Association. Recognizing the need to complement this donation, the Association approved the installation of a satellite system to provide access to information and entertainment for patients and caregivers.

OBJECTIVES OF THE PROJECT

The project was undertaken with the following objectives:

1. Enhance patient welfare To improve the hospital experience for patients and caregivers in the maternity ward by providing access to television services.
2. Promote access to information To enable patients and staff to stay updated with national and international news.
3. Provide entertainment and comfort To reduce stress and create a more welcoming environment within the maternity ward.
4. Strengthen community support To demonstrate the commitment of the Gambian Geneva Association in contributing to health and social development in The Gambia.

IMPLEMENTATION

After the TV donation by Mr. Abubacarr Ceesay, the hospital's director, Mrs. Fatou Ceesay, formally requested support from the Gambian Geneva Association for the installation of a satellite system. The request was approved, and funds were allocated for the project.

The responsibility for execution was assigned to Mr. Muhammed Jaiteh, a member of the Association who was on holiday in The Gambia at the time. Mr. Jaiteh purchased the necessary materials and supervised the installation process to ensure successful completion.

BUDGET

The total cost of the project amounted to 4,980 Gambian Dalasis (GMD). This covered the purchase of materials and installation expenses required for the satellite system.

OUTCOME

The satellite system has been fully installed and is now operational in the maternity ward of New Yundum Hospital. Patients and their families can now access a variety of television programs, which will contribute to their comfort and wellbeing during hospital stays.

ACKNOWLEDGMENTS

The Gambian Geneva Association wishes to extend sincere gratitude to:

- Mr. Abubacarr Ceesay for his generous donation of a television set that inspired this project.
- Mrs. Fatou Ceesay, Director of New Yundum Hospital, for her collaboration and support.
- Mr. Muhammed Jaiteh for his commitment in purchasing materials and supervising the installation.
- All members of the Gambian Geneva Association for their continued dedication and financial contributions towards community development projects in The Gambia.

CONCLUSION

The successful completion of this project reflects the Gambian Geneva Association's dedication to supporting development initiatives in The Gambia. Through collective effort and commitment, the Association continues to make meaningful contributions that improve the lives of Gambians at home.

@ 17:24 pm NYHC
